
Fivewin Xharbour.rar

.php files To run this script you first have to set the following variables: \$updir = 'uploads'. \$rar = 'rar'. \$rar_name = 'rar_name.rar'. \$rar_password = 'password'. \$url = ''. \$rar_size = '50mb' example: \$updir = 'uploads'; //put where your file is \$rar = 'rar'; \$rar_name = 'rar_name.rar'; //your file name \$rar_password = 'password'; //your password \$url = ''. \$rar_name = 'rar_name.rar' The script will then check if the \$rar_name exists in the directory. If it does it will upload the.rar file to the server and create an unique url for it so you can download it from your localhost easily. The same script can be used to upload a.zip and.rar files to a server. Requirements: Feedback is appreciated. If you find any bugs or have any suggestions for improvement feel free to contact me at A: I don't speak Russian but the strings suggest what needs to be done. We're seeking a translator.
