Hopes, passions, dreams, and a love story that will heal the wounds of the past... Everything in life seems to be so much more than meets the eye, and the story you are about to read has the same secret behind every page. A story of endless time, ancient mythology and magic... It begins on the coast of southern England at the beginning of the XXI century. A young couple, Ian Stone and Amada Lovelace, find themselves in contact with a stranger, a down-on-his-luck magician named Eric. This all happens without them even realizing it. For Ian, its as though a wish come true has just been granted... And we only learn that this is not the truth... Amada has been in love with Ian since she was a child, but because she's a bright woman, she refuses to believe what she saw on the day her husband died. Eric is trying to fulfill a strange destiny, which would be known only to him. But if you've been keeping up with the "demons" of this story, you may have already guessed that Ian was not killed by his wife, but rather by his brother Charles. And behind that smoking mirror you may also have already guessed the identity of the murderer that wears a mask. Rise of the Demons: Demons are not just a myth... They've risen in the West. They shape the destiny of countries, manipulate governments, and have the world held in their hands. As popular events such as the earth's axis shift or nuclear experiments threaten to expose them and get the world going insane, Eric soon realizes he must put an end to them before it's too late, and that the only way to do it is by eliminating every demon in the planet. The problem is that all demons have allies and supporters that also seem to have their own reasons. Because of this, only Eric will be able to defeat the demons - and only if he realizes the truth in the past... Purchase Game Items (NFTs) using your own crypto balance You can purchase the following in-game with your own crypto balance: Chests Chests are what you might call a box of resources in Crusader's Dynasty. A chest can be on a team or it can be on an individual. In order to unlock the chest, you need to first kill your enemies while they have it equipped. The chest will then open. You can buy a chest by clicking on it. The chest can contain resources that can be used to buy game items (NFTs) and other in-game items like armor, weapons or mounts. A chest can contain any number of items, depending on how much of the items you have paid for the chest and the market price for the items. The more items you own in the chest, the better the chest will perform. In Crusader's Dynasty you will be able to exchange the items in a chest to other items using the Phantasma Blockchain. NFTs can then be exchanged back to crypto. NFTs: NFTs are the digital item tokens of the cryptocurrency world. The term is a portmanteau of the terms "non-fungible" and "token." Non-fungible means that each token can only be used once or that it can only be used in one item. You can't exchange an NFT that was attached to a character in one game with an NFT

feet under Who knew living in a bunker when the sun was out would make you so happy? By Janet Mayer I used to think my two kids were the funniest things ever. The first sign that my four-year-old daughter was funny was that she relentlessly pestered me with “would you like a peanut-butter-and-banana sandwich,” for breakfast when we lived in Amherst, Massachusetts. So I'd say “absolutely” even though I was always telling her I didn't want one. I was still saying “Absolutely” when six months later she waited for her Canadian-born father to have a sleepover. I said “Absolutely” when, a little later, she showed me her class slides of the chameleon snake in the woods out back — when the chameleon was asleep. To this day my daughter's sense of humor leaves me speechless. And her funny-bone is still intact. Then, of course, there's my son, five years younger than his sister, who is a true clothes horse. Last summer he sent me daily pictures (he sent three each morning) of himself in pants, pants with brown tights, pants with yellow tights, and pants with green tights all over. Right out of Vito Corleone, he'd said. But what's amazing is that my husband, who is a computer engineer, can have far more impact on my development as a person, than my kids. Although he rarely calls our house a bunker, he might as well have sent up a flare. We do live in a secure metal structure, because we live on a heavily populated peninsula surrounded by two rivers, both flowing with salmon and mussels. Our house, which originally had 22 rooms, now has a total of 10. One of the four bedrooms, for example, is now a library — a room with built-in coffee table to read books. My husband, a foodie, always hunts for the latest exotic meat, so we have a freezer and refrigerator full of rabbit hearts, and smoked chinchilla. And a wet bar, because he started referring to our kitchen as a “laundromat in a storm-ravaged old barn” in the Southport, Alabama, house where he grew up. As most readers know, my husband loves me deeply
