bumblebee and jazz arrived on cybertron, but the decepticons were already there. the autobot and decepticon leaders on cybertron decided to help both sides in the war by putting the autobots under the command of the decepticons and the decepticons under the command of the autobots. sam and peter were able to stop the war before it started when they defeated the real zeta prime. sam's new autobot friend, jazz, helped him to save his mother, lois, as well. sam, peter, and lois were able to escape the decepticons' base as it began to self-destruct. sam and peter returned to earth, where they were met by bumblebee and jazz who were both looking for sam and peter. with help from the autobots, sam and peter saved their home planet, cybertron. receiving the key and the red energon, megatron was able to link his mind and body with the omega lock. he then reconstructed the omega lock and, as it was still in stasis, was able to take over a robotic counterpart, which he named "megatronus" after the original. with this new, almost perfect megatronus, megatron proceeded to take a fleet of decepticons to earth, in an attempt to take over the planet. as megatronus was still in stasis, he could not make the ship move, so he gave it a "jump" command. shortly after, starscream came across the ship and confronted megatronus, only to be knocked out. the autobots managed to use the omega lock's power to return megatronus to stasis. with the omega lock now in the hands of the autobots, the autobots were able to save the earth and stop megatronus from stealing the omega lock. megatronus was then placed back in stasis, but not before stealing one of the omega keys. it was then revealed that starscream was the one who'd stolen the key in the first place, and he gave it to megatronus to keep the decepticons from finding the omega lock. the autobots were able to track the omega lock to the moon, where they were able to get a jump on the decepticons. their new powerful ironhide managed to knock starscream out. after a short fight, starscream's body was taken away by other autobots, leaving starscream as a prisoner of the autobots. starscream was left behind on the moon while the autobots, now with a new cybertron key, went to rescue the earth. the fallen starscream was then found by the nemesis crew, who took him to safety. back to the moon when optimus was on earth, he was able to destroy megatronus and restore cybertron. optimus's autobots, including ironhide, began to rebuild cybertron, but found an autobot, bulkhead, who was the only one who could not fit into the space bridge. on the nemesis, starscream escaped from prison and vowed to destroy the autobot, for killing megatron. with this in mind, starscream hijacked the nemesis and was able to lure bulkhead to the bridge, where the autobot was captured. the decepticon was then taken to the omega lock where he was forced to work on repairing it. using the red energon, starscream was able to make the nemesis move again, and he used his psychic powers to force bulkhead to reveal what he was doing on the ship. with this information, starscream was able to reprogram the omega lock, and use it to destroy the nemesis. still, starscream failed to get ahold of the omega key. the nemesis was then struck by a blast from the omega lock, destroying it and taking the autobots with it. all that glitters 5ec8ef588b
