Graphic design software in the early days was hard to use. Technology has come a long way, and software is now intuitive and helps a user express creativity more freely. Selecting the right platform would depend on your work and what you want to achieve with the software. This can be slightly overwhelming because there are a few different Creative Cloud plans to pick from according to what your area of interest is. To make things simple there are 3 different options that you will have to choose from that include Photoshop. First the 'Photography' plan which is \$9.99/mo and grants you access to Adobe Photoshop and also Adobe Lightroom which is a program that allows for detailed photo editing. This is a great value considering the second option is \$20.99/mo for use of only Photoshop. The third and final option which I think is the best option is the Student and Teacher plan that is \$19.99/mo and includes access to every Adobe program available. This is an amazing value because you get access to everything Adobe has to offer. From there you can learn and try new programs that Adobe offers to see what your favorite is. If you would like to save 60% on an Adobe Creative Cloud plan then you can click the link here to sign up. I have recently started a graphic design company. I am looking for people who can collaborate with me. The company will specialize in product design. There is no target market. I can provide as much or as little type of work as the freelancer needs. e3d0a04c9c
